Hello everyone,

this is Color again from YoManga/GoManga. I noticed this series hasn't been updated in over half a year and have decided to pick it up to pair a H-manga with my recent pick up of Postel due to so many scanlators dropping it. I hope you guys enjoy reading this series as I once did when I was just a average reader relying on other scanlator groups. -_-

(That never out out think me 2 hours alone lol, me pls T_T)

Sincererly,
